ME Honey Wood

Crafted from carefully selected natural wood veneers, this collection celebrates the authenticity, warmth and refined character of genuine timber. The natural grain, texture and tonal variations make each panel distinctive, creating surfaces with timeless appeal.

Bonded to high-quality engineered substrates, the veneers provide the beauty of solid wood while ensuring outstanding stability, durability and suitability for demanding interior applications.

Sourced from responsibly managed forests, wood is a renewable material that contributes to a more sustainable built environment.

At the end of its service life, the panels can be recovered and recycled, supporting a circular approach to material use.

Guialmi holds FSC® (FSC-C135535) and PEFC (PEFC/13-31-136) license codes, reflecting its commitment to sustainability.
